***Claim Rejections - 35 USC § 102***

1. Claims 16,17 are rejected under 35 U.S.C. 102(e) as being anticipated by Oldham (6,865,423).

Oldham teaches a device which can produce bursts of pulses, where the bursts are of constant width, and where the bursts comprise various frequencies of stimulation pulses. Re claim 17, to apply the stimulation to smooth muscle, in place of striated muscle, is considered to be intended use, not a structural limitation. Similarly for the delivery of the 'vasoactive sequence' as set forth. The device of Oldham is *structurally* capable of delivering the stimulation as set forth in claim 17 by manipulation of the various parameters, such as width, frequency, time, etc., that the ordinary artisan would be aware of. As such, all of the limitations of the apparatus claims of applicant are considered to be encompassed by the structural features of Oldham. It should be noted that 'how' and 'why' the device is actually used does not reflect upon the structural features of the invention, but are simply intended uses.

2. Claims 16,17 are rejected under 35 U.S.C. 102(e) as being anticipated by Mo (6,631,297).

Mo shows a similar device to that of Oldham, and as such can be considered to encompass all of structural features of applicant's claims. The comments made supra re the intended uses set forth in the claims are also considered to apply in view of the Mo patent.

Art Unit: 3762

3. Claim 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Rezai (2002/0116030).

Rezai is used to show explicitly the effect of stimulation in modifying the microcirculation of various smooth muscles in the patient, see for example par. 45. As with the Oldham and Mo devices, the various well known parameters of frequency, width, time, etc. can be modified by the user as he sees fit. Further, the remarks re intended uses of applicant's device, as set forth supra, apply to Rezai as well.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
